

Smarter Solutions for a Sustainable Future

One Group. Six Sustainable Business Concerns.

Building an integrated business ecosystem across sustainable construction, electric mobility, organic living, global logistics, energy solutions, and recycling.

Company Overview

Practical. Responsible. Future-Ready.

Ecosavvy Group is a diversified business group committed to developing practical, responsible and future-ready solutions for individuals, businesses and communities.

The name “Ecosavvy” represents the Group’s core philosophy—combining environmental awareness with intelligent business practices.

ECO + SAVVY

Environmental awareness combined with intelligent business practices.

Featured Concern: **Ecosavvy Energy Solution**

Our Vision & Mission

OUR VISION

To become a **trusted and progressive** business group that delivers **commercially viable solutions** while contributing to a cleaner, healthier and more **sustainable future**.

OUR MISSION

01 Build & Deliver

Develop reliable products and services across essential and emerging business sectors. Make sustainable solutions more practical, accessible and commercially valuable.

02 Operate Responsibly

Promote cleaner energy, responsible production and efficient resource utilisation. Combine innovation, quality and environmental awareness in business operations.

03 Grow Together

Establish long-term relationships with customers, employees, suppliers and business partners. Contribute meaningfully to Bangladesh's transition towards a modern green economy.

Our Core Values

The principles that shape how Ecosavvy Group thinks, operates and grows.

THINK

Sustainability

Considering the long-term environmental and social impact of every business decision.

Innovation

Exploring improved technologies, smarter systems and better ways to deliver value.

Responsibility

Remaining conscious of our obligations to customers, employees, communities and the environment.

ACT

Integrity

Maintaining honesty, transparency and accountability in every professional relationship.

Quality

Delivering dependable standards across products, services and customer experiences.

GROW

Customer Commitment

Listening carefully and providing solutions that address practical customer needs.

Collaboration

Building strong partnerships and sharing knowledge to support sustainable progress.

Our Business Concerns

Six interconnected businesses addressing distinct market needs while advancing one shared sustainability strategy.

01 — Green Construction

Environmentally responsible construction solutions promoting efficient resource use, reduced waste and improved long-term building performance.

02 — E-Mobility

Cleaner, more affordable and energy-efficient transportation products and services for everyday and commercial mobility.

03 — Organic Food & Health

Responsible food and wellness solutions centred on quality, traceability, healthy living and consumer well-being.

04 — Global Logistics

Integrated logistics support for moving products and commercial resources efficiently across domestic and international markets.

05 — Energy Solution

Reliable energy-storage products, including lithium rechargeable batteries for electric vehicles and modern energy applications.

06 — Recycling

Resource-recovery and recycling initiatives that reduce waste, extend material life and support a circular economy.

ECOSAVVY

ENERGY SOLUTION

Reliable Energy for Everyday Mobility

Dependable lithium energy solutions for Bangladesh's growing electric-mobility sector.

ECOSAVVY ENERGY SOLUTION

Powering Everyday Electric Mobility

Ecosavvy Energy Solution is a featured concern of Ecosavvy Group, established to provide dependable and efficient energy-storage solutions for Bangladesh's growing electric-mobility sector.

WHO WE SERVE

01 — Battery Auto & Easy-Bike Drivers

Reliable energy for daily passenger transport and income-generating mobility.

02 — Auto & Mishuk Owners

Dependable battery solutions supporting consistent commercial operation.

03 — Electric-Bike Owners

Practical energy solutions for cleaner and more efficient personal mobility.

Energy Solutions Built Around Real Mobility Needs

From dependable lithium batteries to technical guidance and after-sales support, we provide an integrated energy solution for everyday and commercial applications.

Lithium Rechargeable Energy Storage

01 — Mobility Battery Solutions

Auto-Rickshaws & Easy Bikes: Battery solutions designed for everyday passenger and commercial mobility.

Autos & Mishuks: Dependable energy support for consistent vehicle operation.

Electric Bikes: Practical battery solutions for cleaner personal transportation.

02 — Energy Applications

Lithium Rechargeable Batteries: Reliable rechargeable energy products for modern mobility requirements.

Commercial Energy Storage: Energy-storage applications supporting broader commercial requirements.

03 — Customer & Technical Support

Product Consultation: Guidance for selecting an appropriate battery solution.

Technical Support: Assistance with product use and technical coordination.

After-Sales Service: Continued customer assistance after purchase.

ECOSAVVY ENERGY SOLUTION

Service That Continues Beyond the Sale

A practical service approach that begins with understanding the customer and continues through installation, guidance and long-term support.

01

DIAGNOSE & ADVISE

Understand

Identify the customer's vehicle and power requirements.

Recommend

Suggest an appropriate battery configuration.

02

GUIDE & COORDINATE

Explain

Provide clear battery usage and charging instructions.

Coordinate

Support installation and necessary technical coordination.

03

SUPPORT & GROW

Respond

Maintain responsive after-sales communication.

Build

Develop long-term relationships with drivers, owners, dealers and partners.

Understand the need. Deliver the solution. Continue the relationship.

ECOSAVVY

E-MOBILITY

Cleaner Mobility for Everyday Progress

Making cleaner and more efficient transportation accessible for everyday users and commercial operators.

Cleaner movement. Practical access. Everyday progress.

ECOSAVVY E-MOBILITY

Moving Toward Cleaner Transportation

Ecosavvy E-Mobility focuses on the transition toward cleaner and more efficient transportation. The concern aims to reduce dependence on conventional fuel while making electric mobility more accessible.

OUR MOBILITY DIRECTION

01 — CLEANER

Supporting transportation solutions that reduce dependence on conventional fuel.

02 — MORE EFFICIENT

Encouraging practical mobility systems designed for everyday and commercial use.

03 — MORE ACCESSIBLE

Making electric transportation easier to adopt for users and operators.

ECOSAVVY E-MOBILITY

An Integrated E-Mobility Offering

Connecting electric vehicles, battery integration, charging guidance and continued support for personal and commercial mobility.

OUR E-MOBILITY OFFERING

01 — VEHICLES

Electric Mobility Solutions

Practical solutions supporting cleaner and more efficient transportation.

Electric Bikes & Light EVs

Mobility support for personal use and light electric-vehicle applications.

02 — INTEGRATION

Commercial Mobility Solutions

Battery-powered vehicle solutions supporting everyday commercial operations.

Mobility Battery Integration

Coordination of suitable battery systems with electric-vehicle requirements.

03 — SUPPORT

Charging Guidance

Practical guidance related to charging and responsible vehicle use.

Maintenance & After-Sales Coordination

Continued assistance supporting dependable vehicle operation.

ECOSAVVY

GREEN CONSTRUCTION

**Sustainable Construction for
Lasting Value**

Responsible building solutions balancing
functionality, durability, resource
efficiency and environmental
consideration.

Responsible Construction. Long-Term Performance.

Practical green-construction solutions for efficient, durable and compliance-conscious industrial development.

01 — PLAN & COMPLY

Sustainable Construction Planning

Efficient resource planning for responsible long-term building performance.

Compliance-Friendly Green Construction

Compliance-conscious planning for organised development.

02 — BUILD EFFICIENTLY

Energy-Efficient Building Solutions

Practical design considerations supporting improved building efficiency.

Responsible Material Selection

Durable materials selected with performance and environment in mind.

03 — RENEW & IMPROVE

Green Renovation & Retrofitting

Upgrading existing properties for better efficiency, functionality and long-term performance.

04 — REDUCE & COORDINATE

Construction Waste Reduction

More efficient material use with reduced construction-related waste.

Project Coordination & Consultation

Practical coordination across planning, communication and implementation.

CURRENT MARKET PRESENCE

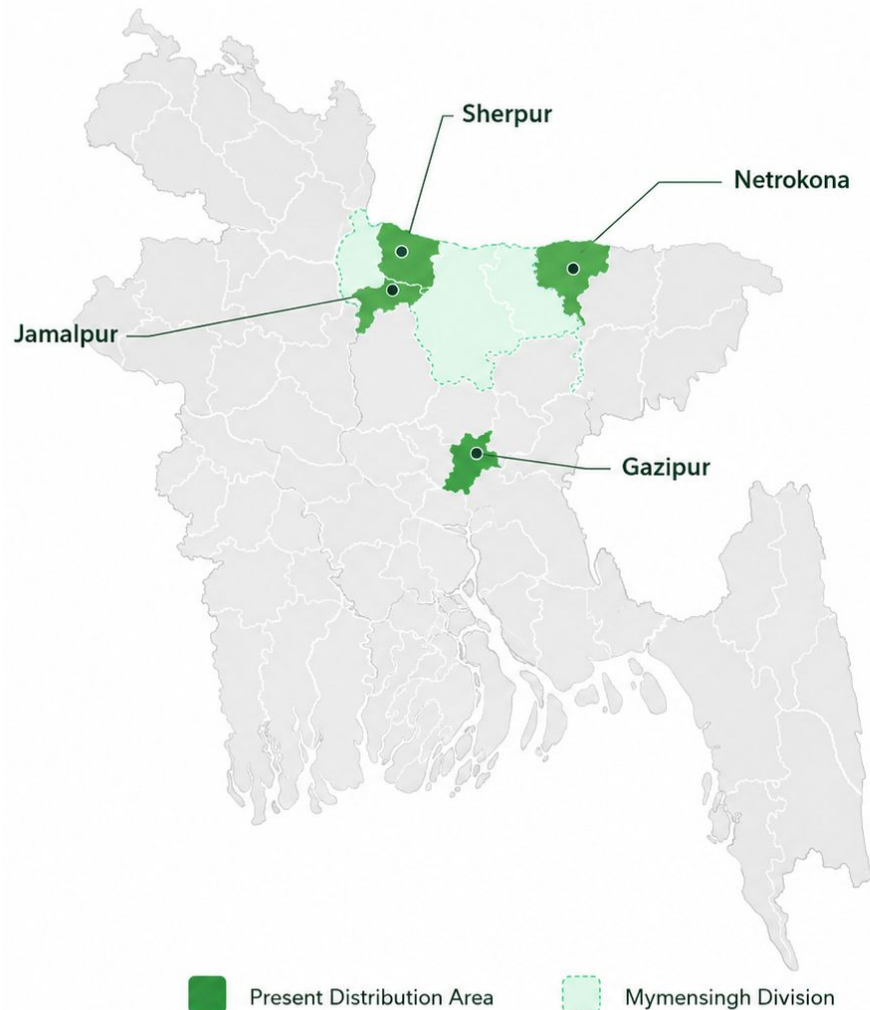

Present Distribution Area

Our current distribution network serves selected districts across central and north-central Bangladesh.

CURRENT COVERAGE

- 01 Netrokona
- 02 Jamalpur
- 03 Gazipur
- 04 Sherpur

Focused regional presence with opportunities for continued expansion.

PLANNED MARKET EXPANSION

Upcoming Distribution Area

The next phase of distribution will expand Ecosavvy's presence across selected districts in central, western, southern and northeastern Bangladesh.

NEXT-PHASE COVERAGE

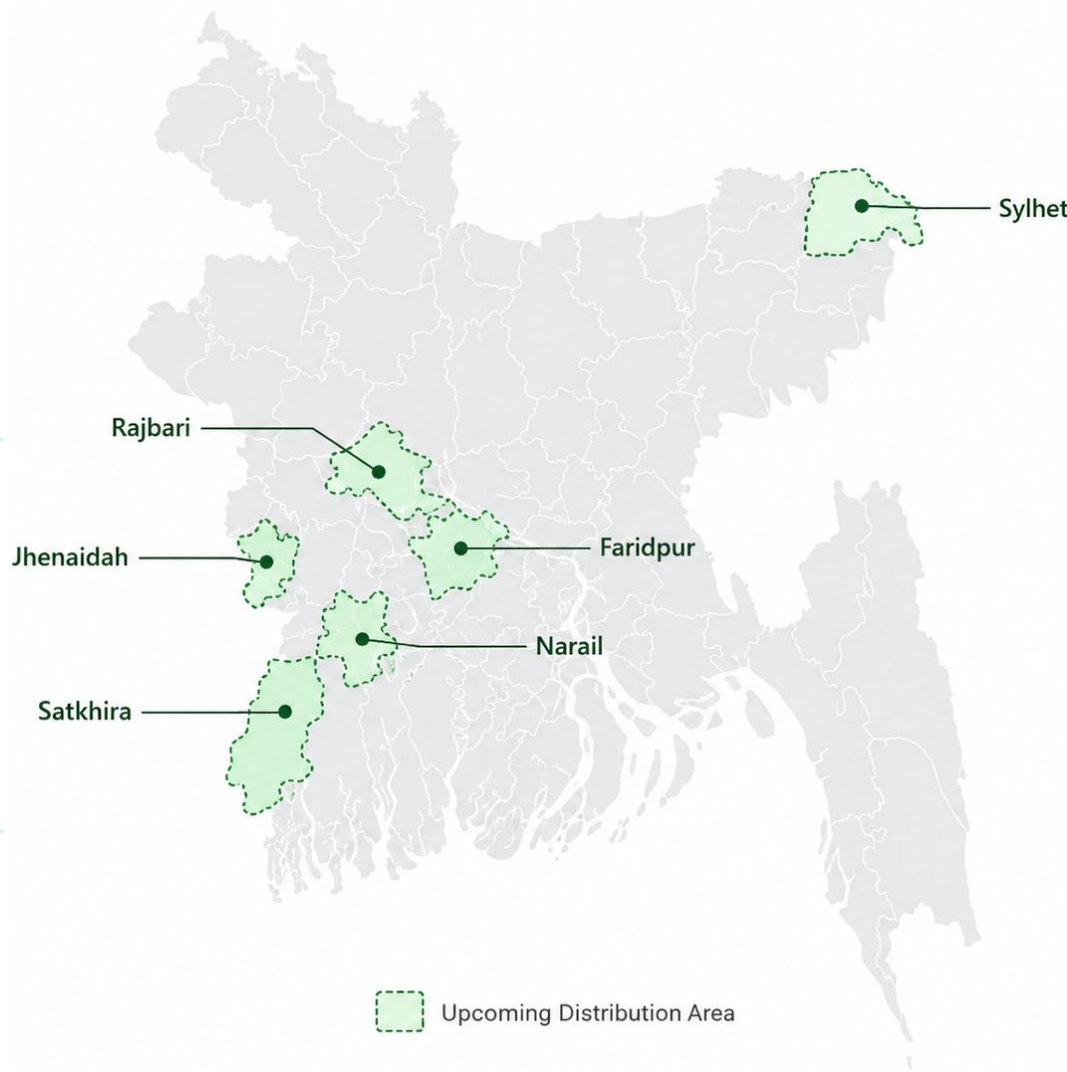

CENTRAL & WESTERN

- 01 Razbari
- 02 Faridpur
- 03 Jhenedah
- 04 Narail

SOUTHERN & NORTHEASTERN

- 05 Satkhira
- 06 Sylhet

Expanding strategically to strengthen accessibility and regional market presence.

Ecosavvy Green Construction
ECOSAVVY GREEN

Building on an Established Foundation.

Ecosavvy Green Construction builds on the established engineering experience of **Steeltech Engineering**, bringing practical industry knowledge into a broader, sustainability-focused construction direction.

— *Evolving green-capability*

ENGINEERING FOUNDATION

Established technical experience supporting the evolution of Ecosavvy Green Construction.

ENGINEERING CAPABILITIES IN ACTION

From Structure to Completion

Practical experience across fabrication, steel-frame erection, roofing systems and on-site technical execution.

Roofing & Cladding Installation

Coordinated on-site installation of engineered roofing systems, showcasing real worksite collaboration and field capability.

01 — Structural Fabrication

Precision fabrication supporting dependable steel construction.

02 — Steel Frame Erection

Structured assembly for industrial and commercial developments.

03 — Roofing Systems

Practical roofing solutions designed around project requirements.

Ecosavvy Green Construction
ECOSAVVY GREEN

Technical knowledge developed through real fabrication, installation and industrial-project execution.

SELECTED INDUSTRIAL EXPERIENCE

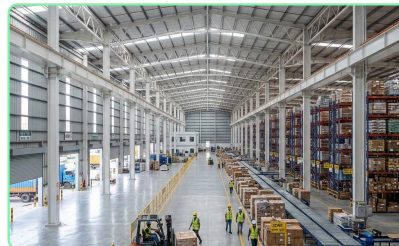

Industrial Projects Across Diverse Applications

Practical experience across manufacturing, warehousing, agro-industrial and specialised commercial facilities.

Manufacturing Facilities

Steel-building solutions supporting organised and efficient industrial operations.

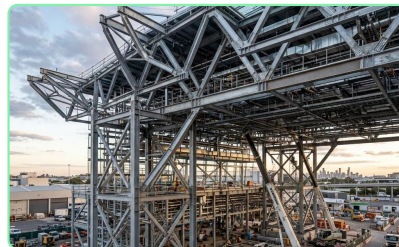

Warehousing & Logistics

Large-span structures developed around storage, movement and operational requirements.

Agro-Industrial Development

Practical structural solutions for processing, production and agricultural applications.

Specialised Industrial Structures

Engineered solutions adapted to specific functional and technical requirements.

Ecosavvy Green Construction
ECOSAVVY GREEN

Experience across varied project environments strengthens practical planning and execution capability.

SPECIALISED CONSTRUCTION SYSTEMS

Beyond the Primary Steel Structure

Integrated roofing, cladding, access and building-envelope systems developed around practical industrial requirements.

Established Engineering Foundation

SYSTEM-BASED APPROACH

Structure, roofing, cladding and access elements are coordinated as parts of one practical building solution.

Engineered Roofing Systems

Roofing configurations developed around span, drainage, ventilation and operational requirements.

01 — Industrial Access Systems

Custom doors and access solutions designed for practical industrial movement.

02 — Wall Cladding & Envelopes

Protective external systems supporting durability, weather resistance and building performance.

03 — Profiles & Components

Supporting elements selected and coordinated for complete steel-building systems.

Complete building performance depends on the coordination of structural and supporting systems.

ECOSAVVY

ORGANIC FOOD & HEALTH

ENGINEERING INFRASTRUCTURE

Engineering Infrastructure for Responsible Agriculture

Specialised greenhouse structures demonstrate how established engineering capability can support more organised, protected and resource-conscious agricultural production.

Built through Steeltech Engineering experience

ENGINEERING FOUNDATION

Specialised Greenhouse Infrastructure

Structured facilities supporting protected agricultural production and long-term viability.

Controlled Growing Environment

Organised internal systems designed around precise cultivation requirements.

GET IN TOUCH

Let's Build a Smarter, More Sustainable Future.

We welcome opportunities to connect with customers, partners, distributors and organisations working toward practical and sustainable progress.
